

IAS Introduces

*Dealer customized presentations
with dynamic interviews product
real time results.*

*If you're not using tablet-based technology at your
dealership, you're leaving money on the table.*

SmartPad shortens the F&I process and creates sales opportunities by utilizing an electronic tablet to gather and present a customizable array of information while the customer is preparing to be transitioned from sales to F&I.

SmartPad can dynamically conduct the F&I interview and electronically deliver results to managers while the customer waits to enter F&I. Alerts can notify the general manager, or other designee, via text or email that a negative situation has occurred and should be addressed immediately before the sale is lost or irreversibly damaged.

Infinitely Customizable | Dynamically Engaging | The New Kind of Survey

SmartPad software runs on the world's most popular tablets, including the Apple iPad, most Google Android tablets and the Blackberry Playbook.

Contact IAS Sales at 800-346-6469 x8989 or www.iasdirect.com for more information.
